

PYTHON

```
def main():  
    # Create a list of numbers  
    numbers = [1, 2, 3, 4, 5]  
    # Iterate over the list  
    for number in numbers:  
        # Print the number  
        print(number)
```

Python

Python is a high-level, interpreted, general-purpose programming language. It is designed to be easy to learn and use, and it has a large, active community of users and developers.
